I agree. That's the right thing to do here. Thanks Harvey.

Cathy can you open up a NCR once Q-pulse is working again I'll write it up on the back of the work orders.

Linda/Chantal please contact eagle and get a RMA # to return these back for reworking.

Thanks

Per Kevin's comments below I think we should send the harnesses back and get them built right – particularly since Eagle wants to become an avionics manufacturer.

Harvey,

From what I can tell (just using the part numbers Eric supplied) M24308/2 is a 9 socket D-Sub connector and D20418-2 is a Jack Screw kit. So someone may have gotten some part numbers crossed at some point but those are not equivalent.

Good morning Harvey

We got these D4728-044 /-045 /-046 wiring harness for the cabin speakers from eagle on the 27th of December. On the work order supplied from Eagle (49780) they are supplying us with this part number **D20418-2 for the Jack Screw Kit ad our drawings require this P/N# M24308-2.**

Is what Eagle is supplying us the equivalent? Could you please confirm this for me so that I can get these harness moving.

Thanks

Harvey, what do you figger?

It shouldn't be a problem. But we will likely wait until the FAA approval is in place before we mess with the MDL.....

Hey Marc is this an acceptable substitute for the D4728 harness that call up M24308/26-1F?

Mike think that we can get this added to the drawings for the D4728 as Graeme has suggested?

Eric,

See the data sheet below where is shows the part numbers that are equivalen to each other. The best thing that DHS can do is to start call out alternatives or allowing alternatives to be used because mil spec parts are not always available and are sometimes to expensive to purchase.

Let me know if this satifies your needs, but I would work on engineering on calling out more readibly available parts.

Thanks

Subject: D4728 Harness assemblies

Hello Mark

I am Eric Downing, the QC Coordinator here at Dart, and I have found a small problem with the Harness you did for us on Dart PO#18452, Eagle Work order #49780.

We found on these D4728-044 /-045 /-046 harness assemblies that the eagle work order bill of material used called up D20418-2. D20418-2 lock is not found on our drawing, but we do ask for M24308/26-1F for the jack screw kit.

Is it possible for you and your team to supply us with the correct information that the D20418-2 is equivalent to M24308/26-1F in order for us to accept these harness. Either from your QA department or from the supplier to which the parts were purchased from. If not we will have to return them back to have the correct hardware installed.

Thanks

Eric Downing
